

Opportunity Analysis of a Major Food and Beverage Manufacturer

Krishnkumar Gupta
3rd April 2023

Outline

- Case Statement
- Analysis of data
 - i. Analysis Of Restaurants Spends & Share
 - ii. Opportunities In Non-commercial Establishments
 - iii. Getting A View Of Retailer Stores
- Summary
- Conclusion

Case Statement

- Get a quick view of the share of F&B spending from existing customers (restaurants) that my company is getting, and if there are any opportunities in specific segments.
- What are the adjacent opportunities from the non-commercial establishments to additionally sell into (note that there are no customers currently in the non-commercial segment). Their data of spending are not available, so will be interested in knowing relevant proxies that could indicate opportunities for us.
- Retailers are a different business division and out of scope for me (Shaun), but some of my customers/prospects could be buying from these retailers – so getting a view of retailer presence adjacent to his customers & prospects will help understand how much of these opportunities are being met / unmet.

Total	132	34	147	308	42	601

Insights & Opportunities:

- According to the analysis, based on **market segment**, out of **601 retailer stores** most of them (308 stores) generate **sales revenues of around <=\$500,000**.
- Retail stores such as **Grocery, Liquor, and Convenience stores** have the maximum contribution in the **annual sale of <=\$500,000**.

Analysis Of Retail Store's Annual Sale Based On Market Segment and % Of Retailer Store categorized By Annual Sale

Insights & Opportunities:

- According to the analysis, based on **market segment**, out of **601 retailer stores**, most of them generate **sales revenues of around <=\$500,000**.
- Retail stores such as **Grocery, Liquor, and Convenience stores** have the maximum contribution in the **annual sale of <=\$500,000**.
- Out of 601 retail stores, **46% of them make revenues of sale <=\$500,000** and **22% of the stores make between <=\$500,001 - \$1,000,000**.

Analysis Of Retail Stores Located In different States Categorized Based On Market Segment

Insights & Opportunities:

- The data of only three states are available; **CT (Connecticut)**, **KY (Kentucky)** and **MA (Massachusetts)**. Therefore, the analysis was only done based on a dataset of these states.
- Based on the market segment, most of the retail stores are located in the state of **KY (Kentucky)** which is **519 (88%) out of 601**.
- **In the state of KY, 259 retail stores** generate sales revenue of **<=\$500,000** which is comparatively larger than the states of CT and MA.

Analysis Of Retail Stores Categorized Based On Market Segment And % Retail Stores Located In States

Insights & Opportunities:

- Based on the analysis, **88% of retail stores** are located in the **state of KY**.
- Most of them are **grocery stores (249)**, **Liquor stores (88)** and **convenience stores (84)**.

Summary

- Out of **611 unique restaurants**, Shaun's company has a good relationship with restaurants generating sales revenue of **=<\$500,000 (357 restaurants)**.
- A total of **326 restaurants** have a **50% share of F&B purchases** from Shaun's company.
- In the state of MA (Massachusetts), it would be beneficial for Shaun's company to make a good relationship with non-commercial establishments working on a **contract basis (49%)** in cities like **Worcester and Boston** where the **school ranges** between **3-5 and 6-9** having **public ownership (48%)**, providing **>2000 meals a day**. Also, targeting the same cities where the **hospital's bed capacity ranges** between **1-50, 51-100, and 101-500**, having **public ownership**.
- Out of **601 retail stores**, **308 stores (46%)** generate **annual sales revenue of <=\$500,000**, and most of them (259 stores) are located in KY (Kentucky).
- The **Grocery (249)**, **Liquor (88)**, and **Convenience stores (84)** play a major role, generating sales revenue of **<=\$500,000** in the state of KY (Kentucky).

Conclusions

- Shaun's company has a good relationship with the restaurants generating sale revenue of $\leq \$500,000$ while most of them have a 50% share of F&B purchases from his company.
- It would be beneficial for Shaun's company to make a good relationship with non-commercial establishments working on a contract basis (49%) in cities like Worcester and Boston where the school ranges between 3-5 and 6-9 having public ownership (48%), providing >2000 meals a day.
- Out of 661 retail stores, 308 stores generate annual sales of $\leq \$500,000$ in three states whereas 259 retail stores (88%) are located in the KY (Kentucky). Hence, based on the good reputation of Shaun's company with the restaurants generating sale revenue of $\leq \$500,000$, it would be beneficial for him to develop a good relationship with retail stores adjacent to his customers in KY (Kentucky) making a sale revenue of $\leq \$500,000$.

A rustic meal is presented on a wooden table. In the center, a wooden platter holds a large piece of grilled salmon with visible grill marks, several green asparagus spears, and several small red potatoes, some whole and some cut in half. A silver fork with a wooden handle rests on the platter. To the left, a basket filled with golden-brown, braided bread sits on a dark cloth. In the foreground, a bowl of salad contains lettuce, sliced avocado, cherry tomatoes, hard-boiled egg slices, and a creamy dressing. To the right, a blue and white speckled mug is filled with a dark liquid. The background features a piece of rough, textured bark.

Thank You!
